EDUCATION

University of Maryland, College Park

Master of Science in Computer Science

Expected May 2027

GPA: 4.0/4.0

- Research under Pratap Tokekar in Artificial Intelligence and Machine Learning
- Relevant coursework: Natural Language Processing, Multimodal Foundation Models, Domain Specific Architecture, Capstone in Machine Learning

University of Maryland, College Park

Bachelor of Science in Computer Science and Mathematics

2023 – 2026

GPA: 3.9/4.0

- Relevant coursework: Algorithms, Programming Languages, Web Application Development, Artificial Intelligence, Data Science, Computer Vision, Machine Learning, Compilers
- Activities: Bitcamp, Google Developer Club, AWS Club, Competitive Programming Club, Sim Racing Club

EXPERIENCE

Venerable

Business Applications Intern

West Chester, PA

May 2026 – Present

- Architected an LLM pipeline on **AWS Bedrock** in Python where an orchestrator agent routes requests to specialized RAG-powered subagents
- Built the retrieval layer grounding every subagent in **100+** internal documents, keeping output traceable to source material
- Implemented subagents for product ingestion, procedure script generation, and product Q&A, cutting script turnaround from weeks to minutes
- Analyzed legacy Powerbuilder code to understand core system functionalities

Handshake AI

AI Fellow

Remote

Dec. 2025 – Jun. 2026

- Trained and evaluated LLMs on real-world codebases, authoring expert-graded reasoning traces to improve code generation quality
- Authored reference solutions and test cases in Python and Java, grading model output on correctness and edge-case handling

Sanas Invite

Software Engineering Intern

Remote

May 2025 – Aug. 2025

- Migrated **1,000+** records from SQL to MongoDB, redesigning the schema around read access patterns to reduce query latency
- Built an admin panel with role-based access control, letting hosts manage **100+** users, permissions, and content
- Rebuilt a legacy React app into reusable, modular components, cutting duplicated UI code and shortening feature turnaround
- Automated build and deploy with CI/CD on **Google Cloud Platform**, replacing manual releases and reducing deployment time

PROJECTS

Netflix Summary | JavaScript, HTML/CSS, Google Gemini 2.5, Chrome Extensions API

- Shipped a Chrome extension to the Web Store summarizing any Netflix title, reaching **10+** active users
- Engineered prompting against **Gemini 2.5** to produce spoiler-aware summaries consistent across genres and runtimes

AI Live Captioning | Python, OpenAI Whisper, Multiprocessing

- Built a real-time captioning system streaming mic audio through **OpenAI Whisper** at **80%** transcription accuracy
- Overlapped capture with inference via Python multiprocessing, holding latency stable across long utterances

Video Game Mania | C#, Unity Game Engine

- Developed a browser game in Unity and C# with core game-loop, state management, and collision handling; deployed to WebGL for **10+** players

SKILLS & INTERESTS

Languages: Python, Java, C, C++, C#, TypeScript, JavaScript, SQL, R, MATLAB, Bash/Shell, HTML/CSS, Rust, OCaml

Frameworks/Tools: React, Node.js, Express, Flask, Django, Docker, Kubernetes, Git, GitHub Actions, REST APIs, Pytest, Jira

Cloud/Data: AWS, GCP, PostgreSQL, MongoDB, Pandas, NumPy, scikit-learn

Concepts: Distributed Systems, System Design, Concurrency, Multithreading, Caching, Load Balancing, RAG, LLM Evaluation, MCP

Certifications: Oracle Cloud Infrastructure Generative AI Professional
